

Oxalis IPR handover

NorStella has recently conducted its first ordinary Oxalis Community Annual Plenary Meeting and has established a mode of operation and that is supported and funded by the Oxalis users.

The background and scope of the transfer are described in the [Document of Understanding](#)

The following key requirements are met:

- NorStella has facilitated the establishment of an Oxalis community, taking responsibility for governing The Oxalis software. The Community was formally established November 19th 2020, as documented in [supporting documents and minutes](#).
- The Oxalis software is to be maintained under existing licensee rules; LGPL3.0 and EUPL1.1, as documented in [Oxalis Governance](#) and [Founding meeting presentation](#).
- Maintenance and development activities are organized based on Open-Source software development principles, governed by the Oxalis Community members, as documented in [Oxalis governance](#).
- Peppol compliance, as defined in the DoU, is the focus for all maintenance and further development of the software components, as documented in [Oxalis Governance](#).

Upon acceptance, the transfer is completed. This entails acceptance that all key requirements have been met, and that exit criteria and fallback mechanisms described in the Document of Understanding no longer are relevant.

NorStella acknowledges, and are thankful for, all support and contributions from DFØ through the process leading to a stable operating situation for Oxalis Community.
